### EXPERT FIELD HARD AT WORK

(Special Bulletin Correspondence.)  
HILO, June 20.—H. Gooding Field, the expert on city and county efficiency, who has been engaged by the officials of Hawaii County to go into the local governmental affairs, certainly lost no time in preliminaries. Two hours after he landed he was "going to it." Mr. Field has established a temporary office in the Hilo hotel, where he is going through the annual reports of the Auditor of the County of Hawaii, from July 1905 to and including the budget for 1912 (estimated) as of December 15, 1911. Up to the present Mr. Field has done a vast amount of tabulating and getting into shape the fluctuations of the different years, this being necessary to obtaining deductions that will make the final report of value.

He will follow, as closely as possible, the methods and tables employed in his recent investigation of the City and County of Honolulu, and figures that it will take him in the neighborhood of six weeks or two months to finish the work. Every assistance is being given Mr. Field in the prosecution of the work in hand, and he is urged to make the investigation and examination as thorough as possible, and to bring to the knowledge of all concerned every pro and con of county government.

Both the financial and physical conditions obtaining here will be laid bare, the latter more particularly to determine the efficiency now in vogue.

On Friday evening there will be a formal meeting of the Board of Trade of Hilo in the parlors of the Hilo hotel at which citizens will be invited. During this meeting Mr. Field will read a paper on economy and efficiency in City and County government. All of the heads of the city departments will attend, and after the reading of Mr. Field there will be a general discussion of the topic.

Wells, Fargo & Co.'s Express has secured the store recently occupied by E. Moses, photographer, and on Thursday opened up for business. About thirty agencies have been established on Hawaii.

On Tuesday the work of remodeling the old pineapple factory at Waikele began. This building will be occupied by the branch of the Honolulu Iron Works. As there are quite a number of families of the workmen in the new branch expected to arrive as soon as the works are opened, there is some speculation as to where they are to live. There is not a vacant house in the city.

The von Hamm-Young garage is fast assuming shape. The boxing for the sides of the building is all up and the pouring of the cement is going on.

### TWENTY-TWO LICENSES GIVEN

The Board of license commissioners yesterday granted twenty-two licenses, disposed of three protests and held one

protest, that of the Anti-Saloon League against R. Murakami of the Adzima Tea House, over until next meeting, pending a decision from the attorney general as to whether the protest against its license contains the number of signatures required by law.

Inspector Fennell said that the protest was 120 signatures short of the number required according to the poll of voters at the last election. Lyle A. Dicker, appearing for the Anti-Saloon League, argued that the old register

had been legislated out of existence and that the Great Register must be used, under which condition the protest contained a sufficient number of names. Chairman Cooke said the attorney general had ruled against Dicker's contention, but thought the decision might have been hasty. The license is held up until the attorney general can review his former opinion. The licenses of S. Kojima & Co. and of Jack Roberts of the Kentucky Saloon were granted over the protest of

the Anti-Saloon League.

The opposition of the tax assessor to a large number of licenses was withdrawn when practically every delinquent proprietor appeared at the tax office yesterday morning and paid their income tax assessments.

The licenses granted were to Hoffschlaeger & Co., W. C. Peacock & Co., T. Sumida, S. Kimura & Co., S. Ozaki, Wing Chung Lung, Chung Ming, Hop Hing & Co., Kwong Chung Lung and S. Kojima & Co.; and saloon licenses

to Ah Chow, Heela; M. Murakami, Wai-manale; K. Ona and Y. Zenhiro, Y. Kimura, Y. Yamasaki, Wai-manale; C. A. Peacock, S. I. Shaw, C. J. Lynch, P. Cornyn and Dick Sullivan, J. R. Roberts and Conrad Bollman.

It was reported at yesterday's meeting of the Promotion Committee that the French State Railways Bureau is interested in Hawaii and is familiarizing Frenchmen with the data concerning the islands.

### MOREHEAD QUILTS HILO DRUG CO.

HILO, Hawaii, June 21.—H. H. Morehead, the man who made seasickness famous, has resigned as manager of the Hilo Drug Store Company. In passing it might be remarked that he sells a cure for seasickness, a remedy, thus has he made seasickness famous on the Mauna Kea and the Claudine, where there is very little seasickness anyhow.

Anyhow, Morehead has resigned. He was not fired, in spite of rumors to the contrary.

Morehead has for the last month been considering starting in business for himself and he therefore, when he made certain of the business he was about to undertake, severed his connections with the firm with which he has for a considerable period been successfully identified.

Morehead will open a drug store of his own on Front street, mauka side, near Moohau Park, in the premises at present occupied by the Japanese, Kamooka, about July 15.

The new firm will likely be known as the Hawaii Drug Company.

There have been several rumors as to the cause of Morehead getting out of the Hilo Drug Company. One was really dramatic in its imagination. It was alleged that Morehead was giving away with every purchase of an electric iron, toaster, chafing-dish or other contrivance which would be worked by heat generated by electricity, a patent which would prevent the electric light and power people from knowing where their juice went.

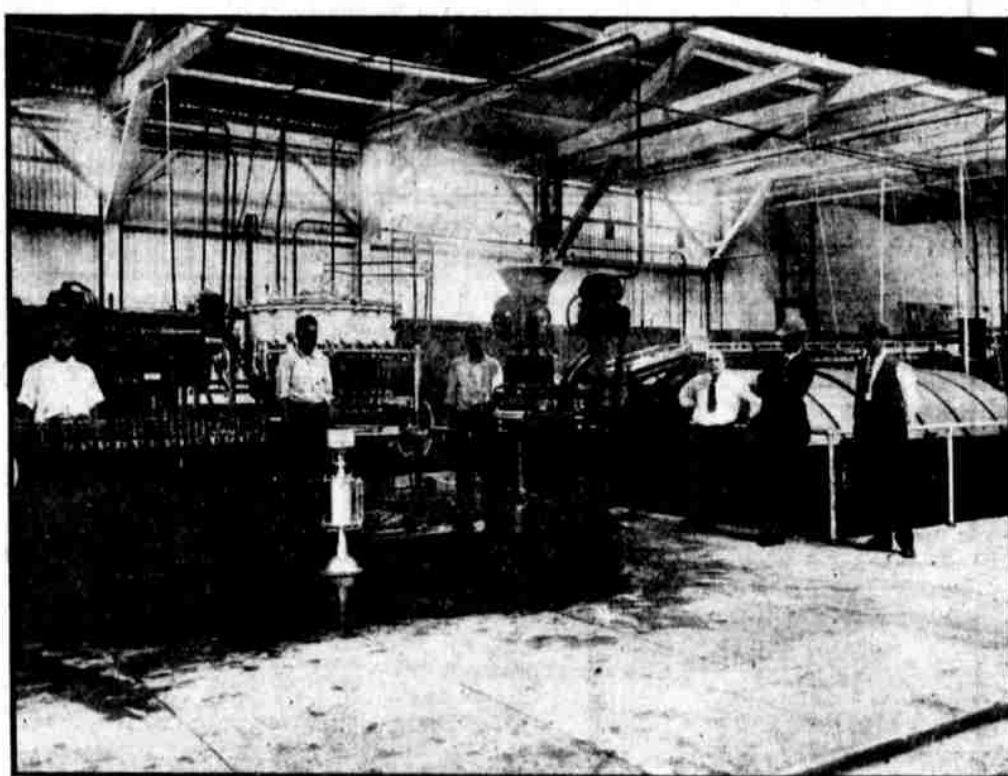

Morehead laughingly denies that he did anything of the kind. In fact Morehead declares that he would give anybody a good price for an invention that would enable electricity users to use electricity without having to pay for it. Morehead himself uses electricity and he pays for what he uses. Like many other people he would like to use the electricity for nothing, if such a thing were possible.

Another story about Morehead's resignation was to the effect that he had secured so many drug agencies in his own name, without giving the Hilo Drug Company the benefit of the agencies, that he was asked to resign.

The truth of the matter is, however, that Morehead resigned for the reason that he was about to start into business on his own hook.

W. S. Wise will probably succeed Mr. Morehead as manager of the Hilo Drug Company.—Hawaii Herald.

Tenyo Maru May Arrive Monday.  
With general cargo from Oriental ports for discharge at Honolulu the Tenyo Kisen Kaisha liner Tenyo Maru is expected to arrive at port late Monday afternoon. The vessel is en route to San Francisco. The Tenyo is in need of fuel oil and for that reason it is the present intention that the vessel berth at Hackfeld wharf.

The Filling and Crowning Machines and the loading end of the Pasteurizer shown in this illustration are good examples of the perfect sanitary machinery installed by the Honolulu Brewing & Malting Co. when the brewing of

# PRIMO PALE

was decided on.

**Primo Pale,** brewed by Hartwig Harders, a brewmaster and chemist, is a beer of exceptional purity and excellence, and from the vats to the consumer is protected from contamination by the most modern devices. Ask for **Primo Pale**
